

Union Marine Management Services Pte Ltd

September 24th 2020

Union Marine Management Services, UMMS, is pleased to announce the take over of M.V. Priscilla under its management.

The vessel is Bulk Carrier of the type Kamsarmax BC, owned by Kambara Kisen and built at Tsuneishi shipyard in Fukuyama Japan. She is registered under the Liberian Flag.

She is equipped with latest energy-saving technologies and addressing

environmental regulation (equipped with Ballast Treatment system and Scrubber).

M.V. Priscilla is adding to the number of vessels that we are proud to have successfully taken over in these difficult times. This delivery will be one more among the few where there were so many processes which were done remotely.

We thank the shipyard and the owners for strong support throughout the process. We also thank our staff ashore and especially the crew who have faced several hardships to show their courage and dedication to take over the vessel safely.

We welcome her to our family on this sunny day in Fukuyama and wish her and crew onboard safe sailings and good health.

Together we sail...
