

Union Marine Management Services, UMMS, congratulates Kambara Kisen Singapore for their latest new building and is pleased to announce the takeover of MV Lady Bellamelia on the 8th of January 2021 from Tsuneishi Heavy Industries Cebu, Philippines.

The vessel is a Kamsarmax design bulk carrier with a DWT of 83.000 MT and is equipped with the environmental technologies (EGR and SCR) to prevent the air pollution from the NOx emissions.

She is registered under the Singapore Flag.

We thank the shipyard and the owners for strong support throughout the process. We also thank our staff ashore and especially the crew who have faced several hardships to show their courage and dedication to take over the vessel safely in these extraordinary times.

We wish her safe and healthy sailings and welcome her to our family as our newest member.
