

Union Marine Management Services Pte Ltd

Union Marine Management Services, UMMS, congratulates MX Bulk Management for their latest new building and is pleased to announce the takeover of MV Erin Manx on the 6th of May 2020 from Tsuneishi Heavy Industries Zhoushan China.

The vessel is a Tess 64 Aeroline design bulk carrier with a DWT of 63.700 MT.

MV Erin Manx will join her sisters Isabella Manx, Mona Manx and Scarlett Manx, making her the 4th MX Bulk vessel under our current management. As with MX Bulk's other vessels, she will be registered under the Isle of Man Flag.

This delivery will be memorable for all of us as there were so many processes which were done remotely. UMMS deeply appreciate the staff onboard who braved the hardship and the quarantine in China to be there for the sea trials and the takeover and also the staff ashore who made this takeover possible in these extraordinary times.

We wish her safe and healthy sailings and welcome her to our family as our newest member.
